Why Induction Program?

The purpose of the education system is to develop good human beings capable of rational thought and action, possessing compassion and empathy, courage and resilience, scientific temper, and creative imagination, with sound ethical moorings and values, while at the same time prepare them for gainful, fulfilling employment.

There exist immense competition and a rush to get into India's best institutions, due to which the student is not able to determine for themselves their interests and their goals, which is a major factor in the current state of de-motivation towards studies that exists among UG students. The success of gaining admission but failure in getting the desired branch, with peer pressure generating its problems, leads to an environment that is demotivating and corrosive. Also, when new students enter an institution, they come with diverse thoughts, backgrounds, and preparations. This might lead to conflict at the level of expression and details. It is important to help them adjust to the new environment, new culture, and inculcate in them the ethos of the institution with a sense of larger purpose.

One will have to work closely with the new entrants in making them feel comfortable, allow them to explore their academic interests and activities, reduce competition and make them work for excellence, promote bonding within them, build relations between teachers and students, give a broader view of life, and build character. It would prepare newly admitted undergraduate students for the new stage in their life by facilitating a smooth transition from their home and school environment into the college and university environment. During this, the student would build a healthy lifestyle, become aware of others and society beyond the individual, enhance creativity, bonding, character, and develop sensitivity towards self and one's relationships, and also bond with their batch-mates and senior students as well as faculty members. Besides the above, several meta-skills and underlying values are needed.

Why Online Induction Program?

During this extraordinary situation due to the pandemic, the Student Induction Program is essential for a smooth transition of students from their home and school environment to their college life. To achieve the benefits of the Induction program mentioned above and owing to the uncertainty of circumstances, an online induction program is desired. It would help the students feel belonged in their institution and act as an ice breaker for the new-coming students, who can interact with their seniors and peers online, and allow them to get used to the college schedules, its rules, and regulations, and most importantly its culture and ethos. Through this system, even before students step into the campus, they'll be familiar with the environment and the people they'll be spending their college life with. The online Induction Program will help the students in:

- *Providing a sense of togetherness and emotional bonding to curb the stress of examinations and lockdowns.*
- *Experiencing various seminars, lectures and talks by eminent personalities and learning interesting topics and life lessons. This will make them accustomed to the “new” way of life and education.*
- *Socializing with their peers, faculty members and seniors through online platforms.*
- *Realiz*
- *ing their areas of interest and their potential in the myriad of skills, hobbies and a plethora of club activities thitherto undiscovered.*
